

# DENIS LISUNOV

INFORMATION SYSTEMS ENGINEERING STUDENT

My appreciation for software began very early, with jailbreaking consoles and pirating video games, due to my family being poor. With time, this fascination evolved into me hosting various Minecraft, Counter-Strike and DayZ servers, for me and my friends to play on. I always wanted to know what it was like "behind the curtain", so that is why I chose programming as my career. I consider myself as punctual, curious and logical.

## EXPERIENCE

06-2022 | 08-2022
